Do you like the idea of getting your hands dirty and playing a pivotal role in a fast-paced, growing tech start-up in a hot, game-changing industry?

If this sounds like you, we've got your perfect job.

Role Overview

At its core, this job is about building the most simple and cost-effective end-to-end Remote Desktop Services SaaS platform. As a member of the core development team, you will manage the day-to-day execution of our application, and coordinate with the Chief Architect to integrate your work into the overall project. A commitment to collaborative problem solving, sophisticated design, and quality product is essential. We care about delivering great code in the allotted timeframe through:

- Designing, building, and maintaining efficient, reusable, and reliable code
- Ensuring the best possible performance, quality, and responsiveness of the application
- Identifying bottlenecks and bugs, and devise solutions to address these issues
- Translating and prioritizing customer feedback into rich valuable micro services
  You will play a vital role in the day-to-day execution of building and maintaining our enterprise-grade platform.

You in? Awesome! Here are the details:

Location:
- Dallas, TX. Local or willing to relocate strongly preferred. Position can be remote if you're absolutely the right person. You can be located anywhere in North America with a reliable internet and phone connection.

Type of Employment:
- Full-time only

What we are looking for:

We are an early-stage company poised for break-out growth over the next 6-24 months and are looking for a talented Cloud Systems Engineer driven by a desire to win, and is willing to roll up their sleeves to play a significant part in building something great. As one of the members of our core development team, we are looking for an intellectually curious, self-starter with a rigorous, analytical mindset and strong bias towards action. Someone that is interested in working across languages in an entrepreneurial, fast-moving environment.

You do not fit in a box, nor do we have a checkbox list of past experiences. You are either:

- experienced senior level Cloud Systems Engineer, with a good understanding of various cloud platforms, and want to join an early-stage, high growth team to broaden your responsibilities and make a significant impact, or
- highly driven, analytical and resourceful professional with excellent communication skills and strong desire to learn and execute on a wide range of cloud infrastructure

General Skills:
Before we get to the required skills, we want to emphasize the need to have outstanding people join our company. We pride ourselves in hard-work, diversity, problem solving, self-motivation and creating a culture where everyone can be themselves while exceeding expectations. People most likely to succeed have the following traits:

- An entrepreneurial spirit; our team is hard working and self-motivated
- Able to adapt and thrive in a fast-paced environment
- Energetic and personable with a professional, can-do attitude at all times
- Strong interpersonal skills and ability to build and maintain trusted, long-term relationships
- Superior analytical and problem solving skills
- Exceptional verbal and written communication skills

Required Skills:
- Direct hands on experience with Microsoft systems infrastructure, deployment and administration, on-premises and on Microsoft Azure
- Experience deploying and managing Microsoft Remote Desktop Services and VDI
- Experience with Microsoft Hyper-V Virtualization
- Proven strong IT troubleshooting skills
- Meticulous systems configuration standards
- Experience in automating system management tasks with PowerShell
- Experience in authoring Microsoft Azure Resource Management Template
  Really nice to have:

    - Familiarity with Amazon Web Service, Google Cloud Platform and other cloud platform infrastructures
    - Experience in a B2B SaaS company

Your Salary:
- Work authorization required
- Compensation will be competitive based on experience and skill set, and will range from $85,000 and above
- Immediate access to healthcare, dental, and vision
- Option to participate in 401K and company matches up to 3%
- Ability to join employee equity pool after 6-months

Required Education:
- Bachelor's Degree in related field, or equivalent experience

Please submit your resume to: careers@mycloudit.com
If you do not feel you meet the requirements for this job, that's OK! We totally appreciate your consideration, and we encourage you to apply for positions we will add in the future.

Lastly, we still want a chance to pay you; if you recommend someone and they get the job we will pay you a $2,500 cash bonus. Feel free to share this job listing on your social media, and with your friends.

THANK YOU!
